Advance Tax on the Transport Sector

The government introduced the advance tax on transport to simplify tax payments for those in the transport sector, increase revenue for road construction and maintenance, and widen the tax base. The tax is collected on motorcycles, passenger vehicles, and goods/freight vehicles with loading capacities above two tons and motorcycles.

NOTE:

- To arrive at the loading capacity, subtract the net weight in the log book from the gross weight, ie ***Gross weight – Net weight = Loading capacity***
- Paying this tax is solely the responsibility of the owner of the vehicle.
- The owner of the vehicle is required to file a return at the end of the year of income to account for their taxes.
