Table of content

PVoC stands for Pre-Shipment Verification of Conformity.
It is a service that ensures imported goods meet the requi-
red standards and regulations of the importing country.
In order to protect the consumers in Uganda from substandard products and to assure safe and quality approved products entering the Ugandan market, the Uganda National Bureau of Standards has implemented under UNBS Act of 1983 mandatory requirements for product imports under the Pre-Export Verification of Conformity to Standards Programme (PVoC).
The PVoC program requires that regulated product imports are verified for compliance in the country of export and before entering the Ugandan market.
A Certificate of Conformity (CoC) is issued by TÜV Rheinland if the products are confirmed as compliant. The CoC is used at Uganda customs points to clear the shipment.

What does PVoC stand for?

What are the regulated products
under the PVoC scheme?

Toys
Mechanical
material and
gas appliances
Protective safety
equipment
Electrical and

(including
cosmetics)
Paper and
stationary

All pre-packaged products require a Certificate of Conformity.
More details will be provided by our experts.

What is the purpose
of having a Uganda
PVoC scheme?

01
02
03

The certificate of conformity (CoC) is a document that verifies that imported goods are in line with the applied regulations and standards of the destination country.

What is the process of issuing a Certificate of Conformity (CoC)?

The exporter or importer will apply to TÜV Rheinland for a CoC by filling the application form. A signature is required to acknowledge TÜV Rheinland?s T&Cs.

If test reports are available by the applicant, those are considered and reviewed by the technical experts.

TÜV Rheinland will inspect the consignment and test* the product in one of the accredited laboratories worldwide to ensure it meets the defined requirements.

Based on a successful conformity evaluation result, we issue a CoC.

If the product is non-compliant, we will report the issues to the applicant to work on the corrective measures (where applicable).

Non-compliant products that were / could not (be) rectified are removed from the consignment.

* Testing charges are borne by the applicant

4

The documentation required for PVoC inspections varies depending on the type of product being assessed, but it can include duly filled application form, technical specifications, and test reports from an accredited laboratory.
